“Surgery Center is Accredited for Patients and Surgeons”

Southgate, MI. When it comes to choosing a location for surgery, often patients do not think they have a choice, but they do. When specifically considering eye, podiatry or GI procedures, the Southgate Surgery Center stands out for several reasons. The first, according to physician Dr. Michelle Akler, MD in Ophthalmology, “When I first started practicing at the Southgate Surgery Center, I was so surprised at the ease of the process. The staff makes my clients comfortable and the technology at the facility is state of the art.” While often clients stay in hospitals all day waiting, this Center works around each patient to insure that families are welcomed, informed and released properly in half the time as a hospital center.

MORE

Even though the Center itself has been around for over thirty years, it has been expanded to offer the latest advances in the technology of operations and is specifically the best venue for eye, foot or gastrointestinal procedures. Patient David H. commented "I was treated very courteously by the entire staff. Much nicer than going to the hospital for the procedure."

The Southgate Surgery Center is state licensed, AAAHC accredited and Medicare approved. Considering surgery? Why not choose a same day surgery center with a warm environment, the latest technology and an experienced staff that treats its patients like family. For more information about Southgate Surgery Center please call (734) 281-0100 or e-mail lindap@cscmi.net.
